Unexpected Ingredient

A man took a bite of his beef supper.
He saw it was a little undercooked.
But he didn't worry about it. What he
didn't know was that creatures were
hiding in his food. He had just eaten
baby tapeworms.

Worms in the Body

Inside the man's body, tapeworm **parasites** grew into adults. Parasites live and feed on people and other animals. These worms used the man's body to grow and lay eggs. And it all happened without him even knowing.
